

10th Annual
PEGS EUROPE
Protein & Antibody Engineering Summit

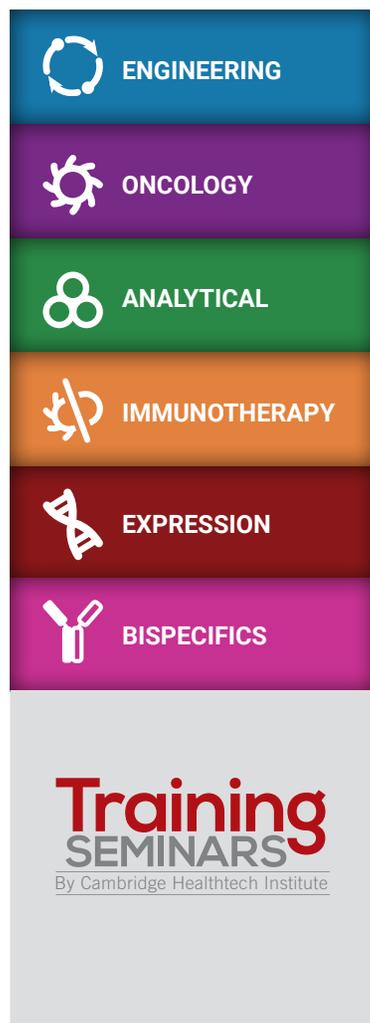

12 – 16 November 2018
Lisbon Congress Center
LISBON, PORTUGAL

* Separate registration required for short courses

MONDAY - TUESDAY
(12 - 13 November)

WEDNESDAY - THURSDAY
(14 - 15 November)

THURSDAY - FRIDAY
(15 - 16 November)

ENGINEERING

ONCOLOGY

ANALYTICAL

IMMUNOTHERAPY

EXPRESSION

BISPECIFICS

Training SEMINARS
By Cambridge Healthtech Institute

Pre-Conference Short Courses*

Plenary Keynote Session

Display of Biologics

Antibody-Drug Conjugates

Optimisation & Developability

Tumour Microenvironment

Synthetic & Systems Engineering

Intro to Bispecifics

Basic Technologies in a Protein Production Lab

Introduction to Protein Engineering

Intro to Bispecifics

Dinner Short Courses*

Engineering Antibodies

Advancing Bispecifics

Analytical Characterisation

CAR T, TIL & TCR Therapy

Optimising Expression

Advancing Bispecifics

Rational Approaches to Biologics Formulation & Delivery

Next-Generation Sequencing for Antibody Discovery and Engineering

Engineering Bispecifics

Novel Therapies for Cancer

Aggregates & Particles

Agonist Targets & Combinations

Purification Technologies

Engineering Bispecifics

Potency and Comparability for Cell and Gene Products

Introduction to CAR T Engineering for Protein Scientists
